

# Global Covid Summit

WASHINGTON, DC, Jan. 21, 2022 -- Following Dr. Robert Malone's appearance on The Joe Rogan Experience, more physicians and medical scientists have joined with their colleagues from around the world in signing the Physicians Declaration. Now with more than 17,000 signatures confirmed through a rigorous validation process, these physicians and scientists are represented by Dr. Malone as he speaks at the march to Defeat the Mandates on Sunday, January 23 in Washington, DC.

The over 17,000 signers to the declaration have reached consensus on three foundational principles:

1. **Healthy children should not be subject to forced vaccination, they face negligible risk from covid, but face potential permanent, irreversible risk to their health if vaccinated, including heart, brain, reproductive and immune system damage.**
2. **Natural Immunity Denial has prolonged the pandemic and needlessly restricted the lives of Covid-recovered people. Masks, lockdowns, and other restrictions have caused great harm especially to children and delayed the virus' transition to endemic status.**
3. **Health agencies and institutions must cease interfering with the physician-patient relationship. Policymakers are directly responsible for hundreds of thousands of deaths, as a result of institutional interference and blocking treatments proven to cure at a near 100% rate when administered early.**

Staying loyal to the Hippocratic oath, the declaration's signers have resisted financial inducements, threats, unprecedented censorship, and reputational attacks to remain committed first to patient health and well-being. After 23 months of research, millions of patients treated, hundreds of clinical trials performed and scientific data shared, and after demonstrating and documenting their success in combating COVID-19, the 17,000+ physicians and medical scientists who signed the declaration support the core principles Dr. Malone and many other doctors have been speaking out about since late last year.

The 17,000+ signatures of the declaration are authentic and must pass a screening process before being officially identified as signing the declaration. Signatories are required to supply their affiliation and a link to their medical organization, facility, or profile. Nurses, non-MD practitioners and non-medical scientists are removed from the list signatories, as are duplicate entries and "bot" emails. The emails of the signatories have been separately and repeatedly tested and verified by a 3rd-party provider.

## On Eve of DC March, COVID Declaration Backed by More Than 17,000 Doctors and Medical Scientists Around the World

Represented by Dr. Robert Malone, Physicians and Medical Scientists Back Rome Declaration with Overwhelming Evidence on Vaccinating Children and Natural Immunity

PHYSICIANS AND MEDICAL SCIENTISTS - UPDATED: JAN 24, 2022 - ORIGINAL: JAN 21, 2022
